ABOUT ME

I am Kehinde Totoola fondly called Kenny. I refer to myself as a technology inclusiveness advocate as a result of my community building activities. I strongly take part in community impact making. I write codes for the web. I am mostly writing backend systems for web technologies and web applications. I'm always inquisitive to learn, practicing and implementing new technologies. In my spare time, I am mostly in schools in my community teaching teenagers and other peers how to code.

SKILLS

Programming Languages:

Python – I mostly write my programs in Python! I use Python(Flask) for the web and it's backend developments. Object Oriented Programming Approaches! (100%)

PHP - (80%)

JavaScript – JavaScript framework Angular for development (70%)

HTML & CSS – Bootstrap and other similar styling tools. I easily use these tools by going through their documentations.

Web Development(Content Management Systems):

WordPress

- Sales Page/ Landing Pages
- Ecommerce websites
- and so on

Office Tools:

Microsoft Word/Excel/Spreadsheet

EDUCATION

Queenmaris College (SSCE)   2018
Ikotun, Lagos

Lagos State University   Undergraduate
Ojo, Lagos

QUALIFICATION & AFFILIATIONS

- **AFRICAVE** 2019 Fellow
- Featured On Google's Blog (https://students.googleblog.com/2019/03/black-history-month-pay-it-forward.html)

EXPERIENCE

May 2016 – Till date
Tutor / Beneficiary
Teens Can Code

https://www.teenscancode.com.ng
I started volunteering with Teens Can Code to bring technology to teenagers and students living in slums or low income areas. I reached thousands of students through volunteering as a coding tutor. Reached students from different schools and different communities. I have also had the opportunity of sharing my story at a tech conference sitting thousand of students.

2017
Web Developer/Management
Teens Connect Magazine

https://teensconnectmag.com.ng
Ikeja, Lagos
My first experience has a web developer. Activities includes:

- Website blog content management (WordPress)

June 2018
Remote Intern
Peleguin ltd and Smart Teens Home

Lagos.
Building websites and web apps for prospective clients using stacks like HTML, CSS and bootstrap

- Social media management
- Managing Online Campaigns and promotions

November 2018 – February 2019
Intern
EFARMS – An Agro-investment company.
https://www.efarms.com.ng
Iseyin, Oyo state.
I worked in hand with different departments (including the corporate strategies and investment department, operations department and mainly with the IT department).
Activities includes:
- Social Media Management
- Managing The company's website (100% PHP)
- Content creation for weekly blog posts / Canva Designs for Social media posts

My Blog posts link- https://efarms.com.ng/blogs/2018/12/19/investing-in-agriculture/

June 2019
Web Developer(Backend)
Ekocity Polytechnic
https://ekocity.com.ng
Lagos.
Worked solely on the backend development of the Lagos State Internal Revenue Service(LIRS) 2019 recruitment portal. The web app was used by 1700+ government staffs. Built with:
- PHP – No framework used! Pure PHP
- HTML
- CSS
- Bootstrap
- Jquery and Ajax

Project link – https://lirs.ekocity.com.ng (You can view-source and find my name in the footer section)
Tasks and development progress is been managed my project managers who assign tasks through Slack!
Project Brief / Features
- Registration Page – Staffs Register with their staff ID
- User Profile – Allows Users to upload a passport photograph and update profile
- Each Staffs are scheduled for their exams in different centers with time.
- Allows Staffs to print their Exam entrance report
- An Accredit page where users profile photo is returned to verify user in-person
- A result page that allows users check their exam score by inputting their staff ID and staff email.
- All data are being store in a MySQL database and photos are stored as blobs

COMMUNITY IMPACT

Coding Tutor

Teens can Code

- Host and facilitate coding classes.
- Held the training of students in Lagos State University (150+ ladies) September 2019

Volunteer

HOUR OF CODE

Ajegunle/Ipaja/Ejigbo

In ensuring inclusiveness, I volunteered in the HOUR OF CODE program implemented in Nigeria in training kids how to program using scratch(a game-like programming tool used to learn how coding works). It was mind blowing for me carrying out a project that is going on around the world. I worked with Teens Can Code in training these kids from various local government areas in Nigeria. Surprisingly for me it occurred it was the first time some kids will touch a computer. My realization for the need for an informed generation of people about the future was crystal clearing in my mind.

Facilitator

Google CS First

I facilitated Google CS first programs, a program to set up computer science foundation for kids. I personally reached a huge number of students through this program across various states in Nigeria.

Project Link – https://g.co/csfirst

Facilitator

Microsoft Annual DoYourBit Challenge

Before the outbreak of the COVID-19 pandemic, I already had great impact records. For the Microsoft Annual DoYourBit Challenge, I have trained hundreds of kids from different schools on how to use a microBit to be eligible to take part in the competition
